Education

Bachelor of Science: Artificial Intelligence, 2028 (Expected)

Horus University - Egypt (Level 3)

Professional Summary

Artificial Intelligence student (Level 3) at Horus University specializing in Flutter Mobile Application Development and Front-End Web Engineering. Hands-on experience building responsive cross-platform mobile interfaces and web applications using Dart, Flutter, and JavaScript, with a focus on clean code and biomedical application integration.

Skills

- **Mobile Dev:** Flutter Framework, Dart
- **State Management:** Cross-Platform Dev
- **Web Dev:** HTML5, CSS3, JavaScript
- **Biomedical Eng:** Web Apps & Healthcare Systems
- **Medical Data:** Medical Data Processing
- **Languages & Tools:** Python, Java, C++, Git, GitHub

Featured Projects

Flutter Mobile Application (Untitled4)

Technologies: Dart, Flutter Framework, Git, GitHub

- Architected and built a responsive cross-platform UI for Android and iOS with dynamic search and news feeds.
- Implemented structured navigation, customizable widgets, and effective state management.

Interactive Web Application (Coffee House)

Technologies: HTML5, CSS3, JavaScript

- Engineered a fully responsive client-side web application using CSS flexbox/grid for flexible layout presentation.
- Utilized vanilla JavaScript for dynamic DOM manipulation, interactive UI elements, and intuitive navigation.

Certifications & Activities

- **Certified Front-End Developer:** Mansoura University (Training in HTML5, CSS3, JavaScript)
- **Mobile Application Development:** Flutter & Dart cross-platform development course
- **Conference Organizing Team Member:** Coordinated logistics and registration for academic conference attendees
